## Process of Calculation, Preparation and Filling Tax Return Online.

Start Calculating your income tax, state tax and IRS tax with online income tax calculator. Tax calculator 2010 offers different tax return calculators for different tax payers as their entity status.

The tax calculation is a fast, simple and easy process. You have to go through your entity status. Then count your tax amount, deductions or exemptions which are applicable then file your tax. After this process, you can also claim for your refund via tax refund calculator online.

The Income Tax Calculator calculates the net income based on the tax rate tables obtained from the 2009-2010 federal income tax table. The tax calculator looks like a regular IRS income tax form and lets you enter your actual or estimated income, dependent, deduction, and tax credit information. There is no need to enter sensitive personnel information such as your name or Social Security Number. You do not need in-depth tax knowledge to use the tax calculator. The tax calculator or tax estimator does not store any information and is not intended to manually file or electronically file your tax return with the Internal Revenue Service.

Enter your filing status, income, deductions and credits and we will estimate your total taxes for 2010. Based on your projected withholdings for the year, we can also estimate your tax refund or amount you may owe the IRS next April. This calculator uses the preliminary 2009 tax tables and rules, subject to modifications by the IRS and changes in the tax code. After this process you can calculate your tax refund as right to claim.
